

**Supplementary Fig. 10.** (A) Network map, (B) interval plot, and (C) comparison-adjusted funnel plot for network meta-analysis of antidiabetic drugs on total stroke among subjects with baseline glycosylated hemoglobin < average 8.0% ( $n=24$  trials). The global test for inconsistency gives a  $P$  value of 0.915, giving no evidence of inconsistency. A, placebo; B, metformin; C, sulfonylurea; D, thiazolidinedione; E, dipeptidyl peptidase-4 inhibitor; F, sodium glucose cotransporter-2 inhibitor; G, glucagon-like peptide-1 agonist; CI, confidence interval.
