

**Supplementary Fig. 13.** (A) Network map, (B) interval plot, and (C) comparison-adjusted funnel plot for network meta-analysis of antidiabetic drugs on total stroke among subjects with type 2 diabetes mellitus duration  $\geq 10$  years ( $n=37$  trials). The global test for inconsistency gives a  $P$  value of 0.367, giving no evidence of inconsistency. A, placebo; B, metformin; C, sulfonylurea; D, thiazolidinedione; E, dipeptidyl peptidase-4 inhibitor; F, sodium glucose cotransporter-2 inhibitor; G, glucagon-like peptide-1 agonist; CI, confidence interval.
