

Supplementary Table 5. Relationships between the change in estimated glomerular filtration rate after the switch to pemafibrate and baseline clinical parameters

| Variable | Correlation coefficient ^a | P value |
|-------------------|--------------------------------------|---------|
| Age | 0.207 | 0.043 |
| Body mass index | -0.001 | 0.996 |
| HbA1c | 0.022 | 0.829 |
| AST | 0.184 | 0.073 |
| ALT | 0.124 | 0.230 |
| γ-GTP | 0.018 | 0.866 |
| Total cholesterol | -0.183 | 0.077 |
| Triglyceride | -0.211 | 0.039 |

HbA1c, glycosylated hemoglobin; AST, aspartate aminotransferase; ALT, alanine aminotransferase; γ-GTP, γ-glutamyl transpeptidase.

^aSpearman's correlation was used for AST, ALT, γ-GTP, and triglyceride. Pearson's correlation was used for the others.
