

**Supplementary Table 2.** Ten-year cumulative incidence of atherosclerotic cardiovascular disease

Variable	Men ( <i>n</i> =3,778)		Women ( <i>n</i> =4,154)	
	Incidence per 100,000 PY	Events	Incidence per 100,000 PY	Events
Total ASCVD	968.8	305	839.3	293
Nonfatal CHD	490.8	154	466.9	163
Nonfatal stroke or TIA	382.4	120	275.0	96
ASCVD death	149.8	47	120.3	42

Values are presented as incidence or the number of ASCVD events. Nonfatal CHD includes nonfatal myocardial infarction, unstable angina, or stable angina pectoris.

PY, person-years; ASCVD, atherosclerotic cardiovascular disease; CHD, coronary heart disease; TIA, transient ischemic attack.
